

American Made Metalworks

ARCHITECTURAL METAL
& FABRICATION

ABOUT US

American Made Metalworks is a North Texas fabrication studio focused on architectural metal, custom furniture, signage, and design-driven fabrication.

What began through custom hospitality and STR projects quickly evolved into a collaborative approach with designers – translating ideas into durable, functional metal elements that enhance the overall design language of a space.

Today, we partner with homeowners, builders, and design professionals to create architectural features that balance structure, material, and aesthetic – from decorative panels and railings to outdoor furnishings and integrated branding elements. Every project is approached with a focus on craftsmanship, longevity, and thoughtful design integration.

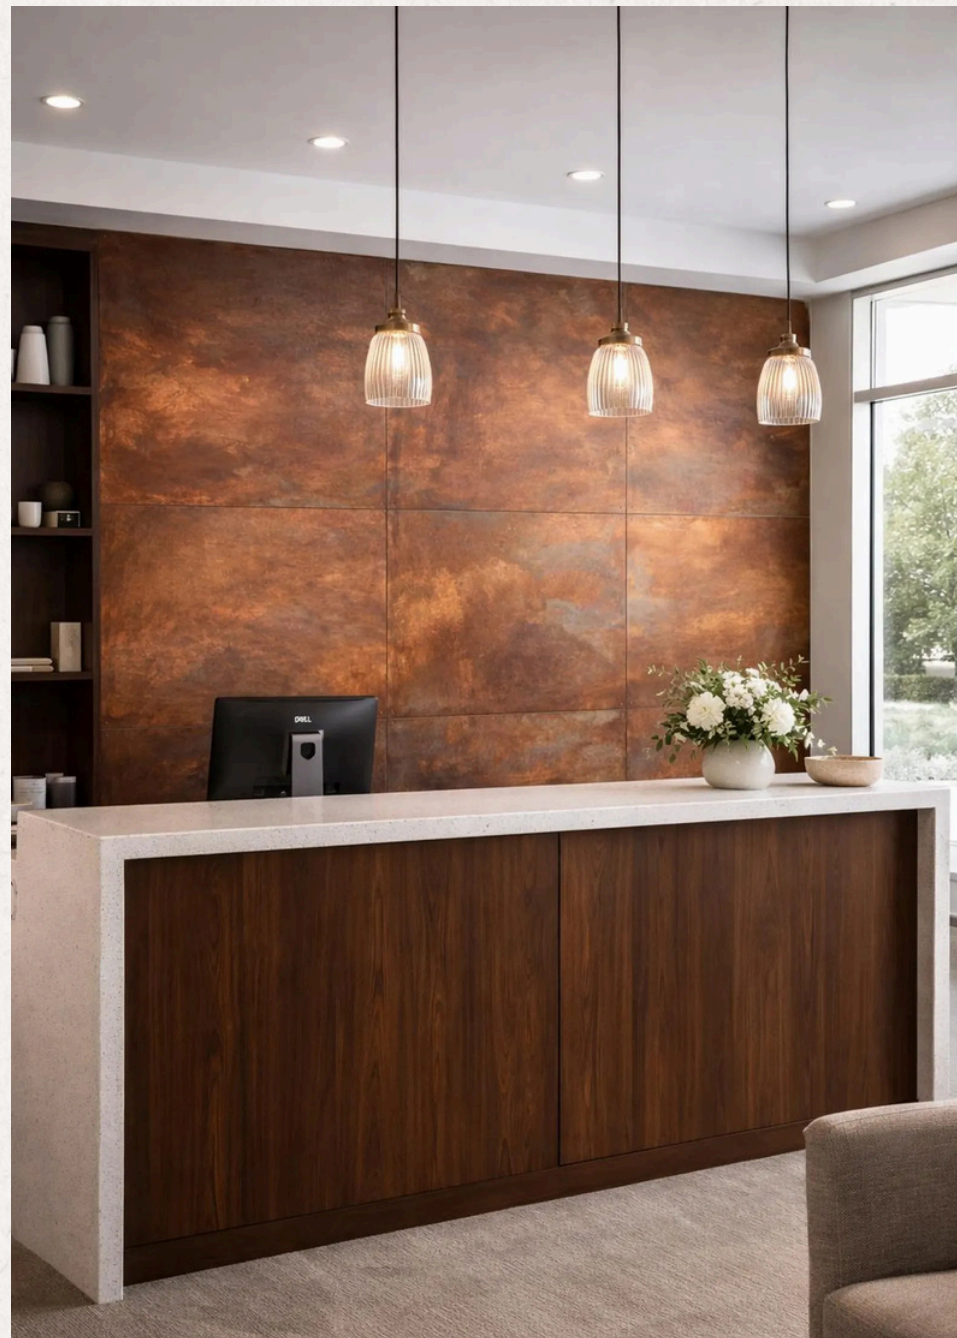

ARCHITECTURAL METAL APPLICATIONS

Architectural metal can serve both functional and decorative roles within a space. At American Made Metalworks, we focus on creating elements that integrate seamlessly into the surrounding architecture – balancing durability, clean design, and material intention.

- Decorative Privacy Panels
- Stair Railings & Architectural Screens
- Outdoor Furniture & Structures
- Exterior Metal Accents
- Backlit Elements
- Signage Systems

DECORATIVE & ARCHITECTURAL ELEMENTS

Custom privacy panels, decorative metal accents, and feature walls designed to add depth, texture, and architectural presence to interior and exterior spaces.

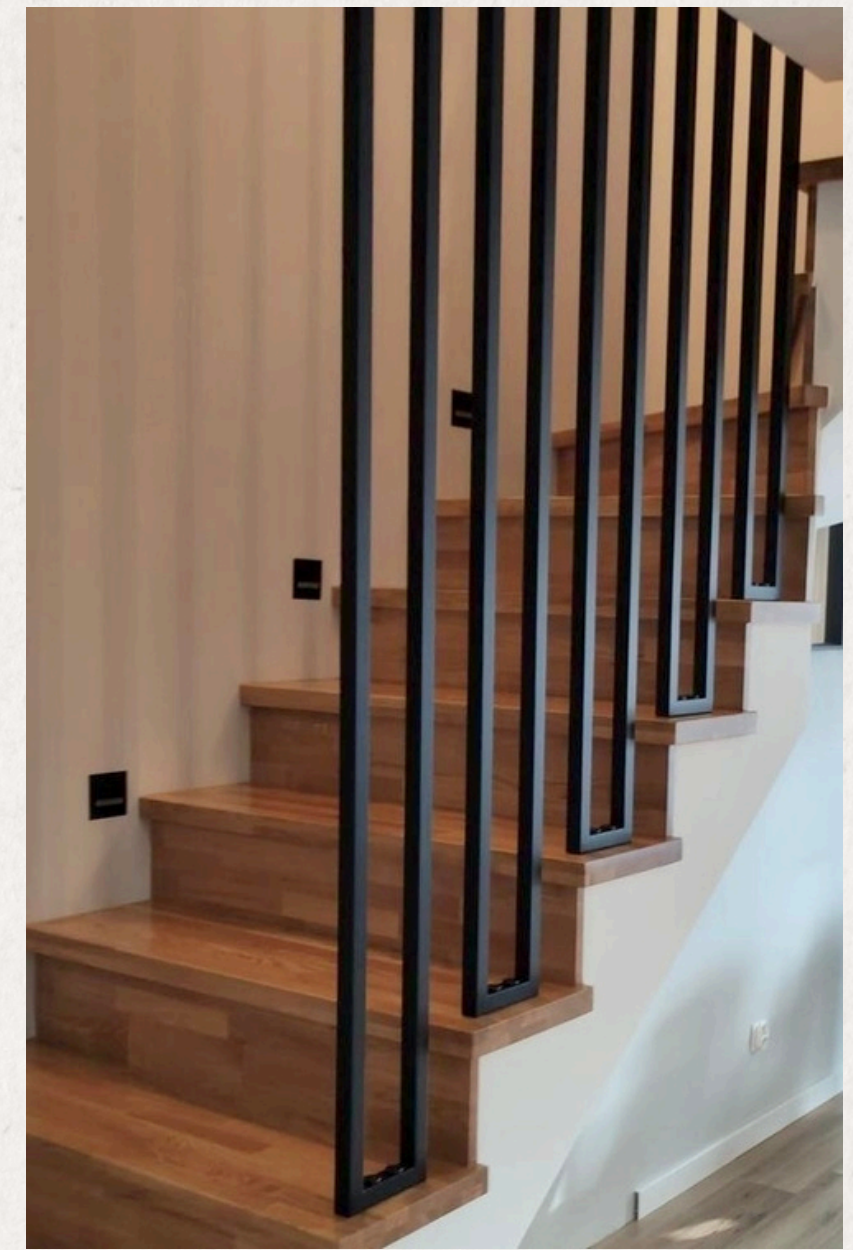

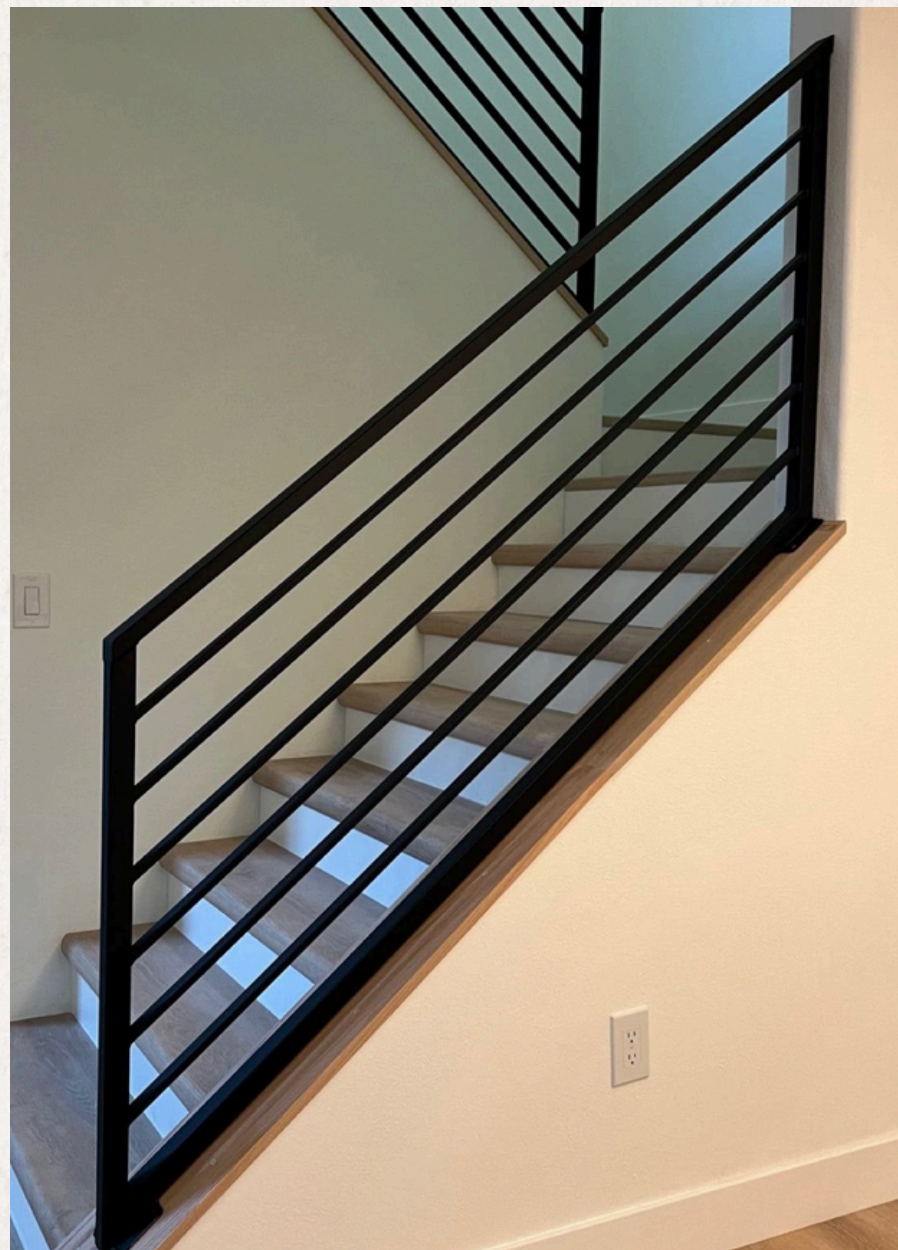

EXTERIOR APPLICATIONS

Exterior metal elements designed to withstand the environment while complementing modern architectural landscapes. Planters, screens, signage, and structural accents are fabricated with longevity in mind, combining durable materials with refined detailing that enhances outdoor living and hospitality spaces..

RAILINGS & STRUCTURAL DETAILS

Railings and architectural metal details designed to balance safety, structure, and clean modern aesthetics. Each system is fabricated with careful attention to proportion, material selection, and installation – ensuring seamless integration with the surrounding architecture.

ARCHITECTURAL FURNITURE & OUTDOOR STRUCTURES

From heavy-duty outdoor seating to custom fire features and metal accents, each design focuses on durability, clean lines, and material harmony within the overall space.

INTEGRATED SIGNAGE

Custom architectural signage designed to integrate seamlessly with the built environment.

Each piece is developed with scale, materiality, and lighting in mind – creating wayfinding elements that feel intentional to the space rather than applied as an afterthought.

Our approach balances clean fabrication with durable finishes suited for both interior and exterior installations.

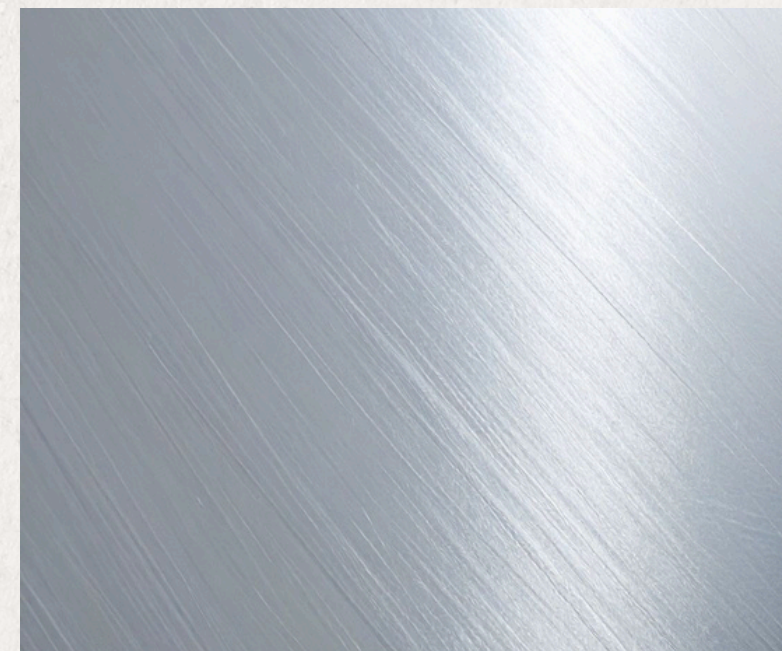

MATERIALS & FINISHES

Carbon Steel

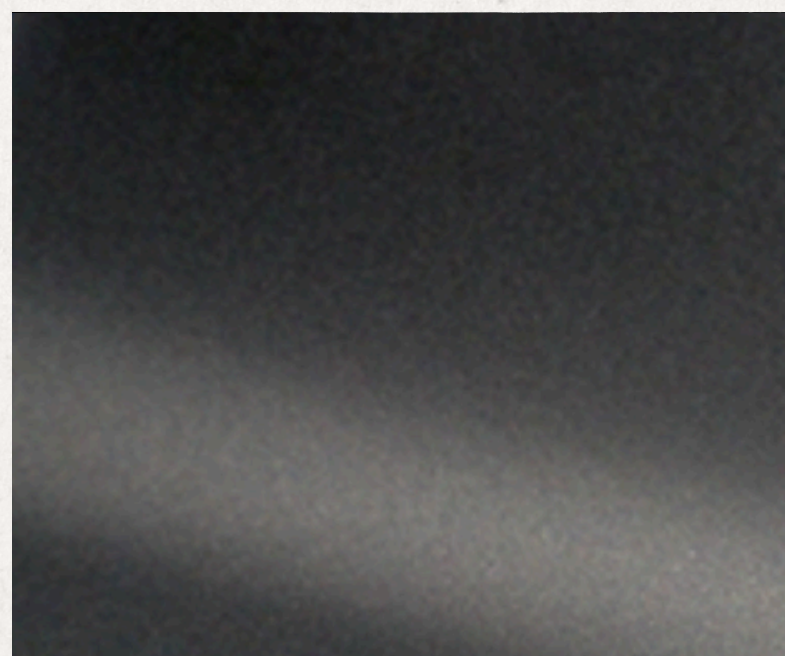

Stainless Steel

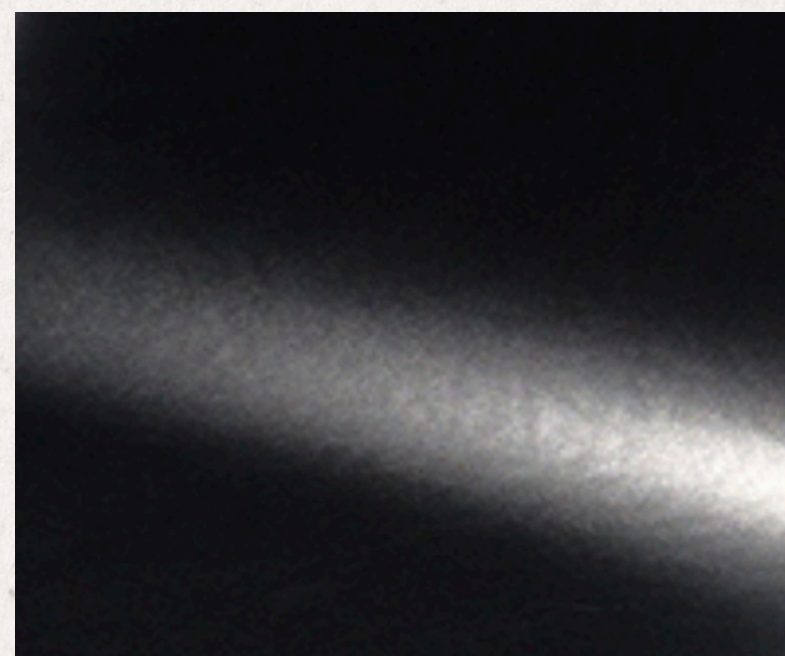

Aluminum

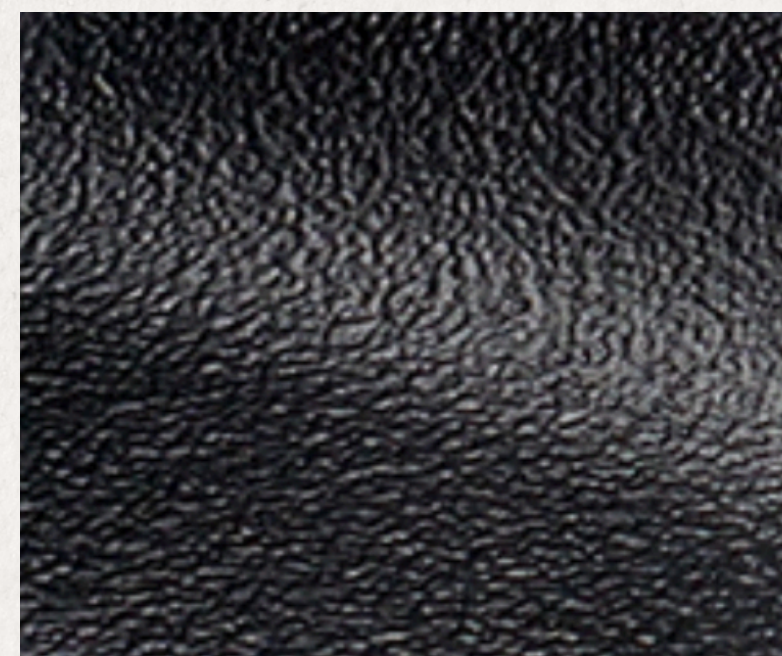

Corten Steel

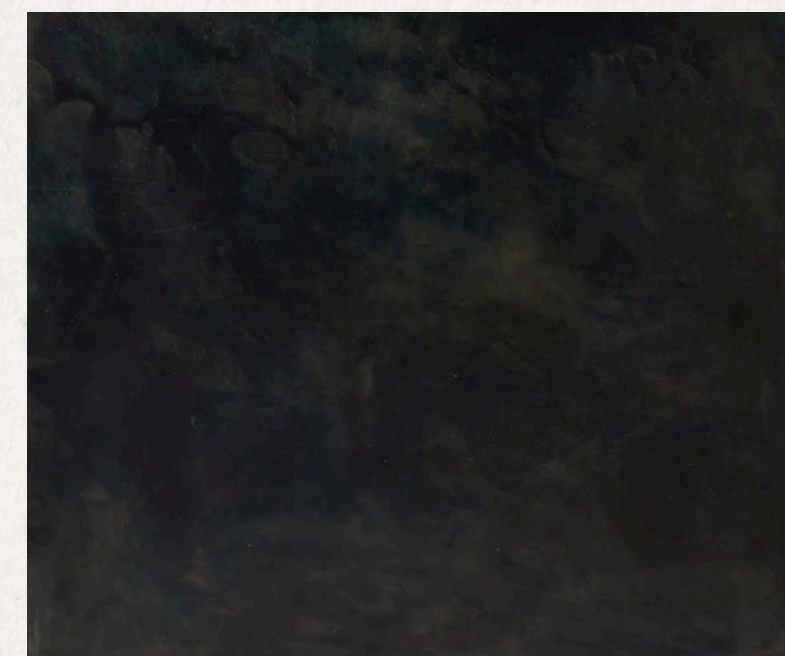

Matte Powder Coat

Gloss Powder Coat

Textured Powder Coat

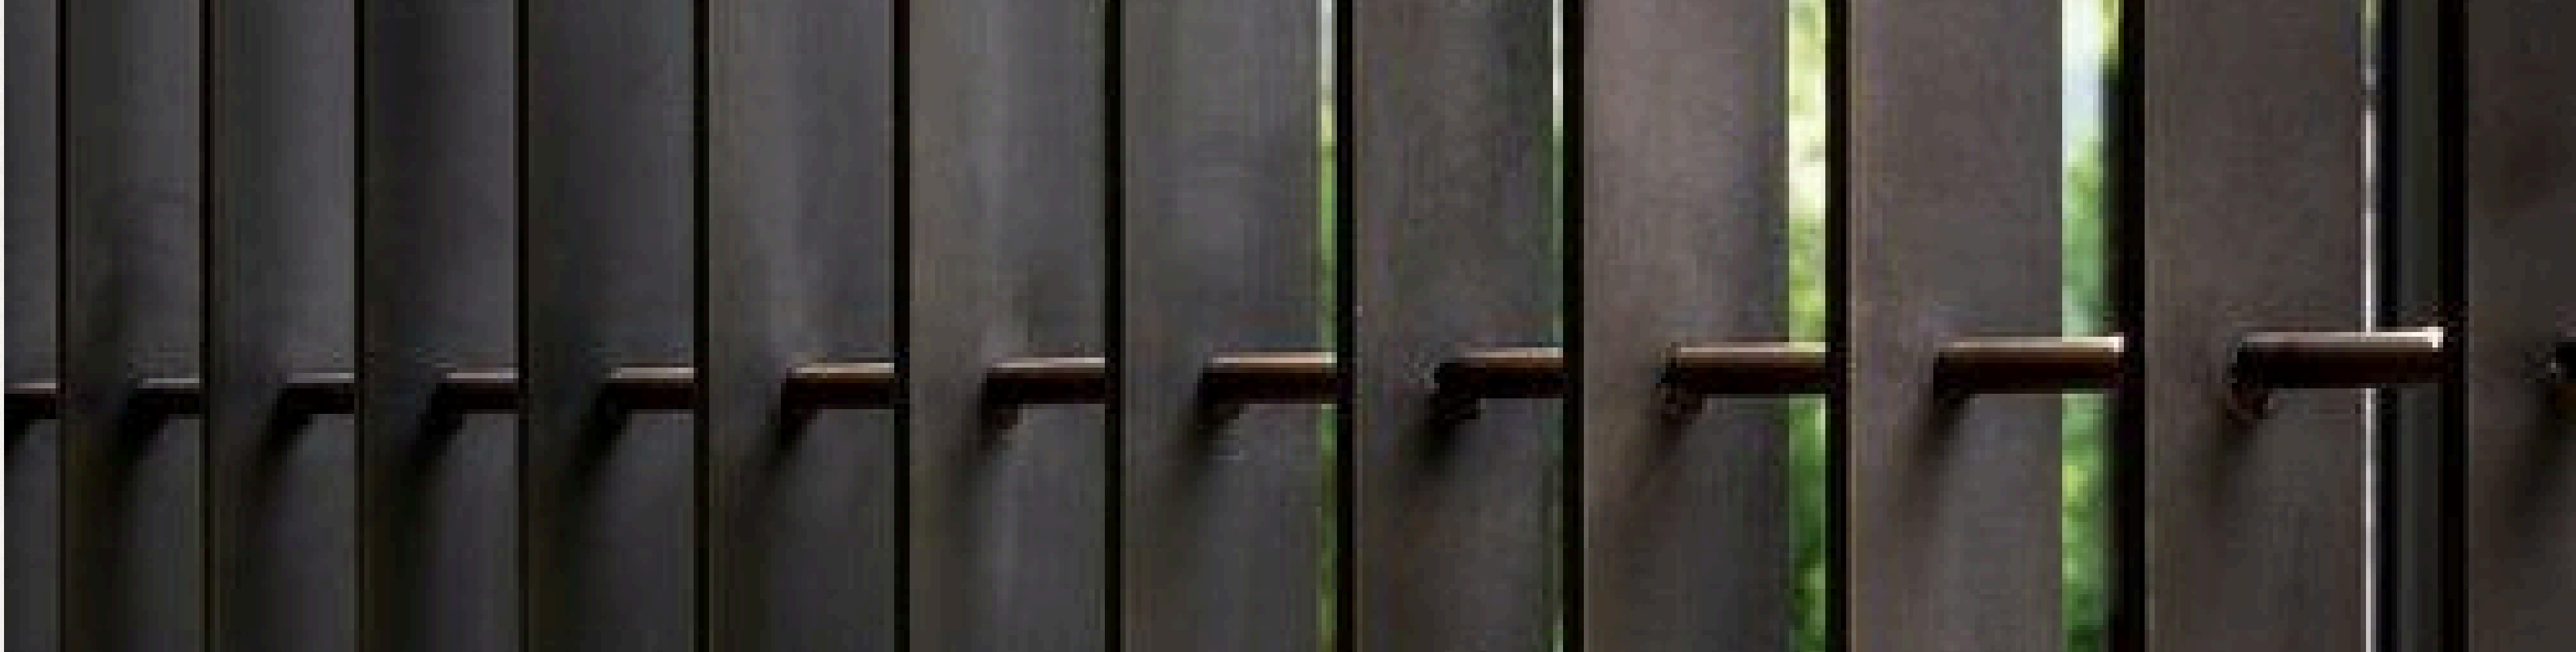

Patina

COLLABORATION/ PROCESS

We partner with architects and designers throughout the design and build process, helping translate creative concepts into refined, buildable metal elements. Early coordination allows us to advise on material selection, attachment methods, and fabrication strategy while maintaining the integrity of the overall design intent.

Shop drawings, finish samples, and detailed fabrication planning ensure each piece integrates seamlessly within the architectural environment, supporting both visual impact and long-term durability.
